

*"I'd be happy to use NCC again,
without reservation."*

SharePoint consultancy services from NCC

Independent, impartial, expert, trusted

Microsoft's SharePoint collaboration tool can bring significant benefits to business and is described by Microsoft as the "Business Collaboration Platform for the Enterprise and the Web." SharePoint is a feature-rich product and its application is almost endless.

The very nature of the product, however, with its 'easy-to-get-started' capabilities often leads to unstructured implementations which soon deviate from business requirements and can become expensive for the benefits they deliver.

Our SharePoint consultants have a wealth of experience in helping get SharePoint projects back on track and helping organisations get their SharePoint strategy right in the first place. In our experience, getting SharePoint governance right, at the start of a project, will save significant time and expense later on.

We offer SharePoint:

- **Support**
- **Training**
- **Development**
- **Consultancy**
- **Mentoring**

See over for details

The National Computing Centre's mission is to help our clients make the right decisions about IT strategy, investments, deployment and management issues. We are expert, independent of any vendor, impartial, willing to go the extra mile to ensure our customers get the best advice and offer great value for money.

"I'd rate the overall experience of using NCC as excellent"

We can help you with...

SharePoint Training

If you are just starting out or you are an experienced user looking for advanced training we can offer bespoke courses tailored to your needs at a variety of levels:

- **End User**
- **Power User**
- **Train the Trainer**

SharePoint Strategy & Implementation Support

We can help you ...

- **Establish whether SharePoint is the right tool** to deliver your business goals. If SharePoint is not suitable we can advise on alternative solutions.
- Put together an appropriate **SharePoint strategy**, based on our consultants' deep understanding of SharePoint's capabilities, the implications of deployment and your business requirements.
- **Rescue SharePoint projects** that are not delivering upon expectations.
- Create a **SharePoint Governance** plan.
- With implementation, project management, support and awareness programmes tailored for your team.

SharePoint Support

- Our support offerings are tailored to suit budget and need. All you need to do is decide what level of support is required.
- SharePoint Incident Support Packages cover any technical issues that occur that may affect the performance of your site.

- "How Do I?" support packages help users get the most out of their site.
- Full Support provides all of the above as well as developer days that are available for you to use to enhance your site as the need arises.

SharePoint Development

- We will match your requirements to a resource that can be supplied by the day, week or month. We can provide you with a selection of CV's to help you choose the most appropriate expert.
- Short or long-term contracts, or permanent hire.
- Offshore option for multiple developers.

SharePoint consultancy

- Site performance, cost reduction & functionality reviews.
- SharePoint deployment planning services.
- SharePoint 2010 upgrade planning service.
- Expert Mentor.

Alongside these areas of expertise, we can help in other fields too. Please see our website for further details and case studies.

If you would like a no-obligation chat about your own requirements, please contact us:
